PROFESSIONAL SUMMARY

Backend-focused software engineer with hands-on experience building Spring Boot micro-services and RESTful APIs in an enterprise financial services environment. Proficient in Java, SQL, and MERN stack development, with exposure to Agile/Scrum delivery, microservices architecture, OOP, and automated testing. Passionate about building scalable, well-tested backend systems and enterprise-grade applications.

EDUCATION

Nitte Meenakshi Institute of Technology, Bengaluru

2024 – 2026

Master of Computer Applications (MCA) | CGPA: 8.4 / 10

SDM Degree College, Ujire, Dakshina Kannada

2021 – 2024

B.Voc — Software & Application Development | CGPA: 8.6 / 10

TECHNICAL SKILLS

Languages & Databases: Java, JavaScript, SQL, MySQL

Frameworks & Tech: Spring Boot, REST APIs, Node.js, Express.js, React, MongoDB, Bootstrap, JWT, Mongoose

Tools & Concepts: Git, GitHub, VS Code, Figma, Android Studio | DSA, OOP, DBMS, Microservices, Agile/Scrum

PROFESSIONAL EXPERIENCE

Société Générale Global Solution Centre (SG GSC)

Jan 2025 – Present

Software Engineer Intern | Bengaluru, India

- Developed and maintained Spring Boot microservices for the FEESONE Trade Services platform, contributing to brokerage fee calculation and invoice processing workflows in a high-volume enterprise banking system.
- Designed and integrated RESTful APIs using Java and Spring Boot, enabling reliable communication between backend services and supporting end-to-end trade service operations.
- Performed bug fixing and feature enhancements across multiple backend modules; participated in code reviews and unit testing to uphold coding standards and reduce defect backlog.
- Collaborated in Agile/Scrum ceremonies - sprint planning, stand-ups, and retrospectives - consistently delivering assigned tasks within sprint timelines.

PROJECTS

Sweet Shop Management System | MERN Stack

[\(Github\)](#)

MongoDB, Express.js, React, Node.js, JWT, bcrypt, Multer, Jest, Supertest

- Architected a full-stack MERN e-commerce platform with role-based access control (user/admin), JWT authentication, bcrypt password hashing, and a database-persisted shopping cart with real-time inventory sync.
- Built 10+ RESTful API endpoints (auth, product CRUD, cart management) with Express.js and Mongoose; implemented JWT middleware to protect routes and restrict admin-only inventory operations.
- Developed a React frontend with Context API state management, optimistic UI updates, product search/filter, multi-page checkout, order history, and an admin panel with Multer-powered image uploads.
- Wrote an automated test suite with Jest and Supertest covering authentication, product endpoints, cart operations, and stock validation against an isolated test database.

EXTRA-CURRICULAR ACTIVITIES

- Submitted Milk Link to KSCST (Karnataka State Council for Science and Technology) - a technology-driven solution for streamlining milk collection, management, and distribution in rural cooperative networks.
- Actively engage in software development communities, technical problem-solving, and self-directed learning in backend architecture, system design, and modern engineering practices.

LANGUAGES

English (Proficient) | Kannada (Fluent) | Tulu (Native)
